A GLOBAL GROUP

WE DRIVE THE E-FUTURE

At our core, we are a group of innovative manufacturing companies, united by a mission to shape the future of electrification across industries. Our journey began in 1974 with **Amer**, founded by *Francesco Battistella* in Northern Italy.

Today, this vision has evolved into a **global group** with seven manufacturing facilities across Italy, Switzerland, and Germany, supported by three strategic hubs in India, China, and the United States. Together, we are driven by a passion for delivering **custom and integrated solutions**, empowering businesses with advanced motorization and electric handling technologies.

Our expertise encompasses a broad range of products, from alternators, permanent magnet generators (PMGs), and voltage regulators to electronic drivers, AC and DC motors, traction systems, and linear motion systems.
